Tight mortise-cut, double-wall sill dam extends inside the jamb, no need to caulk open seam.
- **Foam-Tite® compression seal** with straddle gasket is a closed-cell neoprene weatherseal that secures the sill and sash to prevent air and water infiltration.
- **Dual-fin wool-pile weatherstripping**
Protects around the perimeter of all sashes to fight air infiltration.
- **Reinforcement**
Lock screws are fastened into metal for secure hold.
- **Integral ergonomic lift rails**
Comfortable, ergonomic design and is significantly stronger and more durable than snap-in lift rails.
- **Balance covers**
Give the window a more attractive and polished appearance.
- **Interlock system**
Interlock at sash meeting rails creates a super-tight seal against air infiltration, providing security, comfort and well being.
- **Tilt-in sash system**
Dual operating tilt-in sashes make cleaning safe and easy from inside.
- **Vent latches**
When deployed will limit sash travel, allowing for a secure way to keep windows open for ventilation.

AIR INFILTRATION

Poorly designed windows don't have built-in airlocks, weatherstripping, and the barriers necessary to keep air from forcing its way in. Leaky windows cause drafty homes. Barrington windows greatly minimize air leaks with numerous air barriers designed into our advanced sill design.

The Barrington window comes standard with one of our double-pane, high-performance Low-E glass systems with a stainless steel spacer, which will help to dramatically improve the efficiency of your new windows.

Sliders come in 2- and 3-lite models. 3-Lite Sliders have a center fixed panel and are available in configurations of 1/3-1/3-1/3 and 1/4-1/2-1/4.

Casements have a unique hinged design that allows for easy cleaning from the inside of your home.

Kingsroyal patio doors are built strong, including a heavy-duty metal reinforcement and an extruded aluminum screen door frame, while still remaining aesthetically appealing.

AAMA GOLD LABEL

Barrington Windows proudly carry the AAMA Gold Label, which means that they meet stringent performance standards for air and structural load.
